

使用说明

1. 在 Azure Marketplace 中点击"立即部署"按钮,会进入到 Azure ARM 模式根据自己的需求填写相应网络参数,具体详情请参考下方 VM-Series 部署手册.
2. 当部署成功后进入 portal.azure.cn,点击"虚拟机",点击虚拟机名称"点击概述",之后找到"公共 IP 地址/DNS 名称标签",复制 IP 地址或 DNS 名称。
3. 浏览器里输入 [https:// IP 地址或 DNS 域名](https://IP地址或DNS域名), 用户, 密码是自己在 ARM 模板里定义的。
4. 详细部署架构请联系销售电话或邮箱。

English Discription:

The VM-Series next generation firewall licenses (BYOL) option allow you to pick and choose the VM-Series next generation firewall licenses, security subscriptions (Threat Prevention, WildFire, URL Filtering, GlobalProtect) and technical support that are appropriate For your needs. BYOL can be executed as an a-la-carte option or through an Enterprise Licensing Agreement (ELA) which provides you with a single authorization code for large scale deployments. Support options are offered in local language support through Premium Partner Support . More information on our support offered can be found at <https://www.paloaltonetworks.com/services/support>

NOTE: For additional information or to obtain an evaluation license for BYOL, please contact your local Palo Alto Networks sales representative or channel partner.
